1 SHAMPOOS

1.1 TRICOXIL SHAMPOO

WHAT IS IT?

Anti-hair-loss shampoo. Free from sulphates.
For frequent use, physiological pH 5.5

WHAT DOES IT DO?

Gentle formula that cleanses the hair and scalp, stimulates blood flow, regenerating and unclogging the hair bulb.

Regenerates the microbiota of the scalp.

HOW IS IT USED?

Wash the hair with a gentle massage, using a specific circular motion according to the beauty routine you are following. Rinse thoroughly with warm water.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols of lime, rosemary and turmeric. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Hydrolysed soy protein. With **antiviral, antifungal,** bactericide and antioxidant properties. A complete vegetable protein that provides the whole range of essential amino acids, and acts as a barrier to protect the hair, retaining moisture, softening the cuticle and helping to reconstruct the hair's surface to leave it shiny, easy to brush and full of body.

1 SHAMPOOS

1.2 | BALANCE SHAMPOO

WHAT IS IT?

Balanced cleansing formula (pH 5.5), eliminates possible impurities on the scalp.

WHAT DOES IT DO?

Cleanses the hair and eliminates all impurities from the scalp caused by imbalances of the skin such as flaking or seborrheic problems, regenerating the microbiota of the scalp.

HOW IS IT USED?

To prepare the scalp's hydrolipidic film, gently wash the hair before any treatment. On the second wash, use a specific circular motion according to the beauty routine you are following. Rinse thoroughly with warm water.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols of lime, rosemary and turmeric. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Hydrolysed soy protein. With antiviral, antifungal, bactericide and antioxidant properties. A complete vegetable protein that provides the whole range of essential amino acids, and acts as a barrier to protect the hair, retaining moisture, softening the cuticle and helping to reconstruct the hair's surface to leave it shiny, easy to brush and full of body.

1 SHAMPOOS

1.3 FREQUENT SHAMPOO

WHAT IS IT?

Gentle shampoo for the hair and scalp. Balanced formula with a physiological pH of 5.5. For daily use.

WHAT DOES IT DO?

Texturises, hydrates and regulates the hair and scalp, leaving a pleasant refreshing effect. Regenerates the microbiota of the scalp.

HOW IS IT USED?

Wash the hair using a gentle massage. On the second wash, use a specific circular motion according to the beauty routine you are following. Rinse thoroughly with warm water.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols of lime, rosemary and turmeric. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Hydrolysed soy protein. With antiviral, antifungal, bactericide and antioxidant properties. 1 SHAMPOOS

1.4 FOAM SHAMPOO

CERTIFIED

WHAT IS IT?

Gentle foam shampoo to rebalance, soften and protect, with a physiological pH of 5.5.
For frequent use.

WHAT DOES IT DO?

Gently cleanses and eliminates discomfort of the scalp (itching or scabs, etc)
Helps to restore the physiological pH (5.5).
Regenerates the microbiota of the scalp and hair.

HOW IS IT USED?

Use every day for 30 days before and after treatment, applying the foam gently to the whole scalp. Leave for 10 minutes and rinse thoroughly with warm water.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols of lime. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Inulin. Active vegetable ingredient, a polysaccharide extracted from plants like chicory root, that naturally hydrates and softens.

Burdock extract. Unclogs, reduces inflammation and boosts healing, with antibacterial, purifying and regenerative properties.

2 TONERS

2.1 | SPRAY THERMAL

WHAT IS IT?

Purifying, regenerative, hydrating and soothing toner.

For post-treatment use.

WHAT DOES IT DO?

Its high content in natural polyphenols and prebiotics acts to rebalance the scalp and regenerate the microbiota of the scalp.

HOW IS IT USED?

Before washing, apply as many times as necessary to the scalp, using a specific massage. Wash using a suitable formula.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Provitamin B5. Panthenol (provitamin B5) is a cosmetic ingredient that is notable for its hydrating, softening and soothing properties. It also boosts the healing process and cellular repair.

2 TONERS

2.2 | BALANCE TONER

WHAT IS IT?

Hair toner to boost the rebalancing action of the microbiota of the scalp.

WHAT DOES IT DO?

Controls the microorganisms responsible for certain imbalances and helps to prevent development of skin problems.

HOW IS IT USED?

Apply to the scalp to moisten the skin and massage in gently. Do not rinse.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Niacinamide (active vegan ingredient). Vitamin B3 (niacinamide) is an active ingredient with a high content of biological properties to hydrate, refirm the skin and regulate sebum production. It protects against polluting factors and restores the barrier of the stratum corneum and the skin's elasticity.

Biotin 5 and vitamins H, B7 and B8. Known as the vitamins of the skin, hair and nails, they are essential for tissue formation in the skin and hair, stimulating blood circulation in the scalp.

3 | LOTIONS

3.1 | BALSAMIC CREAM

WHAT IS IT?

Nourishing and soothing lotion for the scalp. For post-treatment use.

WHAT DOES IT DO?

Reduces discomfort and redness in the skin, and restores balance to the scalp, regenerating the microbiota of the skin.

HOW IS IT USED?

Following any treatment, apply gently every day to the scalp. Leave for 10 minutes and wash with Tahe Organic Care Foam Shampoo.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Almond Oil. Natural product with a high content in vitamins A, B and E. Rich in proteins, minerals, monounsaturated fats, oleic and linoleic acids such as omega 3 and 6, and antioxidants.

Bisabolol. A powerful vegetable antioxidant (from the chamomile flower) with regenerative, anti-inflammatory, bacteriostatic, soothing, anti-irritant and healing effects. Restores skin elasticity and protects against aggressive factors in the environment.

4 TREATMENTS

4.1 OZONOTHERAPY 300 ml

CERTIFIED

WHAT IS IT?

Cream formula effective for follicular regeneration treatments.

WHAT DOES IT DO?

Helps to oxygenate and nourish the scalp, boosting follicular regeneration.

HOW IS IT USED?

Apply to clean skin once or twice a week after washing.

Massage gently in with a circular motion, leave for 10 minutes and rinse thoroughly.

ACTIVE INGREDIENTS IN THE FORMULA

Natural polyphenols. These ingredients are natural super-antioxidants from vegetable origin, and help to reduce the effects of free radicals, while preserving the structure and function of the cells. Reduces the signs of aging and combats the damaging effects caused by UV rays.

Calendula. A highly effective medicinal plant that boosts healing, with antiseptic and regenerative properties. Helps natural collagen production.

4 TREATMENTS

4.2 | OZONOTHERAPY 100 ml

WHAT IS IT?

Cream formula effective for follicular regeneration treatments.

WHAT DOES IT DO?

Helps to oxygenate and nourish the scalp, boosting follicular regeneration.

Calendula. A highly effective medicinal plant that boosts healing, with antiseptic and regenerative properties. Helps natural collagen production.

4 TREATMENTS

4.3 INTENSIVE TREATMENT

CERTIFIED

WHAT IS IT?

Intensive double action programme for hair thinning and loss.

WHAT DOES IT DO?

Thickens and strengthens. Provides essential nutrients and helps to stimulate root activity to preserve the hair's thickness from roots to ends, by maintaining the follicles, scalp and hair healthy and strong during the growth phase.

HOW IS IT USED?

Apply one vial every day for 6 weeks to the scalp when dry or wet, using a specific massaging motion. Do not rinse. For maintenance apply 1 vial twice a week.

ACTIVE INGREDIENTS IN THE FORMULA

Turmeric*. Vegetable growth factors found in turmeric (*capilia longa*). Concentrate rich in peptides and designed to establish the optimum medium to reactivate hair growth.

Omega 6*. Stimulates root activity. Omega 6 is transformed into lipids and ceramides which help to reconstruct the hair's fibres.

**Active ingredient free from GMO, pesticides, herbicides, heavy metals, VOC and BSE. Respects the environment. Free from prementioned allergens. Significant reduction of carbon footprint. Of vegetable origin. We prioritise the use of eco-certified prime materials to reconstruct the hair's fibres.*

4 TREATMENTS

4.4 | RADIOFREQUENCY

WHAT IS IT?

High-frequency technology that transforms the applied electric current into heat, producing a positive effect on the scalp.

WHAT DOES IT DO?

The process produces gradual heat on the skin, acting principally on the existing collagen fibres, to reconstruct them and produce an effect called collagenogenesis in the skin (the formation of new collagen), which increases its collagen production and boosts firmness.

PRINCIPALES BENEFICIOS DEL TRATAMIENTO

- Notably increases blood flow.
- Revitalises and increases cell activity.
- Facilitates the absorption of coadjuvant treatments.
- Helps to prevent and correct miniaturised hair.
- Helps in the absorption of nutrients and the elimination of excess oils and flaking skin.
- Provides oxygen and nutrients.
- Stimulates the hair bulb.
- For stronger, shinier hair.
- Decongestant and relaxant.

Radiofrequency also generates O₃ gas (ozone) which has the following benefits for the hair:

- Improves blood flow.
- Fungicide and bactericide.
- Eliminates oils and dandruff.
- Eliminates microorganisms.
- Anti-inflammatory action.
